

Having problems logging into your Hotmail account?

Your login screen should appear something like this if you have a Hotmail account.

If you have signed up for a Hotmail account to sign in you must type your full e-mail address in the box provided.

Example

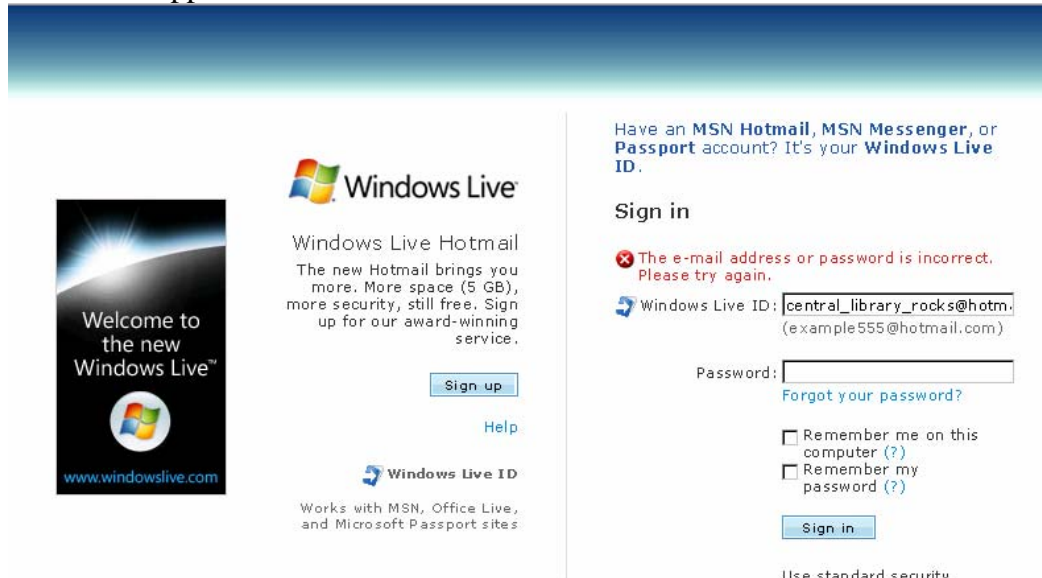

WRONG: Username: central_library_rocks

OR

RIGHT: Username: central_library_rocks@hotmail.com

With the username and password box filled in –you should be able to access your account.

If for some reason you either forgot your password, username, or mistyped something your screen will appear as so:

To figure out your password click the “Forget your password?” link just below the “Password” box. This should redirect you to another page that walks you through the necessary steps to recover your password.
